Objectives

Final-year B.Tech CSE student specializing in AI/ML. Experienced in predictive modeling, feature engineering, and deployment with 95%+ accuracy in HR analytics and IoT projects. Seeking industrial internship or entry-level AI/ML role to apply skills in real-world business challenges.

Education

Noida Institute of Engineering and Technology — Greater Noida
B. Tech, Computer Science and Engineering — **CGPA: 8.09**
Aug 2023 – Jul 2027

St. Xavier Senior Secondary School — Gonda
Class: XII — **Percentage: 71.2 %**
Jul 2020 – Jul 2022

R. S. Memorial Public School — Siddharth Nagar
Class: X — **Percentage: 78.4 %**
Jul 2018 – Jul 2020

Technical Skills

Programming Languages:	Python, C, C++, SQL
Machine Learning & Data Science Libraries:	Scikit-learn, TensorFlow
Data Processing:	NumPy, Pandas
Visualization:	Matplotlib, Seaborn
Deployment:	Streamlit
Databases:	MySQL, MongoDB
Developer Tools:	VS Code, Jupyter Notebook
Version Control:	GitHub
Model Serialization:	Pickle, Joblib
Coursework:	Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Linear Algebra, Probability & Statistics

Projects

Employee Overtime Cost Forecasting | AICTE Internship [Link] **Jan 2026 – March 2026**

- Engineered an end-to-end HR analytics ML pipeline to forecast employee overtime costs; applied feature engineering on 10+ workforce variables, trained a Linear Regression model achieving R^2 of 0.93, and deployed via Streamlit, reducing manual cost estimation effort by ~40%.
- **Libraries**: Python, NumPy, Pandas, Scikit-learn, Matplotlib, Streamlit | Model: Linear Regression | Data Preprocessing: StandardScaler, Train-Test Split | Evaluation: RMSE, R^2 Score| Deployment: Streamlit Cloud
- **Algorithm**: Linear Regression | Data Preprocessing: StandardScaler, Train-Test Split | Evaluation: RMSE, R^2 Score

Customer Purchase Intent Prediction | Perzonix Solutions [Link] **Jun 2026 – Aug 2026**

- Developed a Gradient Boosting classification model to predict customer purchase intent using online shopping behavioural data.
- 12,330 sessions, 18 behavioural features
- Best model: Gradient Boosting (90.25% accuracy, 0.9363 ROC-AUC)
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

Experience

Data Science Intern | HCLTech

Project: Smart Manufacturing Downtime Risk Classification [Link] **Feb 2026 - May 2026**

- Built a predictive maintenance classification system for smart manufacturing; pre-processed sensor telemetry data (missing value imputation, label encoding), engineered 8 risk features, trained a Decision Tree Classifier achieving 95% accuracy on 10,000 machine records, and deployed an interactive Streamlit dashboard for real-time downtime risk monitoring.
- **Tech Stack:** Python, NumPy, Pandas, Scikit-learn, Matplotlib, Streamlit
- **Algorithm**: Decision Tree Classifier | Evaluation: Accuracy 95%, Precision, Recall, Confusion Matrix | Data Pipeline: Imputation, Encoding, Train-Test Split
